

## SUZOHAPP to Bring Intelligent Connectivity and Innovative Technology to Transport Ticketing Global 2020

DE MEERN, THE NETHERLANDS, January 20, 2020 – SUZOHAPP – a global market leader of software and hardware payment management solutions – will be exhibiting at Transport Ticketing Global, the world’s largest public transport gathering. The event takes place at Olympia London from January 28-29. SUZOHAPP can be found at booth #E18.

At Transport Ticketing Global, SUZOHAPP will demonstrate how its solutions secure the entire payment management process. Through innovative technology and intelligent connectivity of all parts of the process, the SUZOHAPP suite of solutions improves users’ business operations, from reconciliation and accuracy to monitoring and profitability.

Visitors will be introduced to CashComplete™ Connect – Transportation Edition™- an extension of the industry leading CashComplete™ Connect payment management automation software platform. Built specifically to meet the payment management needs of the Fare Collecting Transportation and Route Delivery industries, this software automates the entire payment process, from payment collection to reconciliation.

“CashComplete™ Connect – Transportation Edition™ is truly revolutionary in the benefit it brings to this market,” said Steve Fitton, Vice President – Sales, Transportation Sector, EMEA. “It connects all parts of the payment management process, the result of which is reliable and actionable information that can be used to improve overall business operations significantly.”

SUZOHAPP’s powerful software integrates with hardware and back-office systems to give users real-time visibility of their payment management operations. On display at Transport Ticketing Global will be SUZOHAPP’s Recycling Cash Solutions, including coin recycler RCS-400 2.2 and note recycler RCS-500. With their high recycling capacity and proven sensor technology, these machines are powerful automators of back office operations, allowing users to lower working capital and improve cash visibility.

Also on display will be the SCANCOIN line of coin and note counters and sorters, including the DTC-2 and SC-8220, the Touch PRO and 27” Edge kiosks, as well as SUZOHAPP’s vast offering of components, such as Custom printers, the Bill-to-Bill note recycler, the MFL note validator, the ICS coin handler, coin validators and hoppers.

“Intelligent connectivity is what allows us to secure the payment process for our customers,” said Simon James, SUZOHAPP’s Executive Vice President – Retail, Hospitality & Transport EMEA. “By connecting hardware, software and back-office systems, we give our customers the information they need to boost productivity, profitability and security.”

## About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement.
